Waugh, M.L.; **4**: 117.
Wood, R.W.; **1**: 17.

TITLE INDEX

The Accuracy of Approximate String Matching Algorithms. Nesbit, J.C., **3**: 80.

The Accuracy of Cognitive Monitoring During Computer-Based Instruction. Garhart, C., Hannafin, M., **3**: 88.

Application Report: Computer-Assisted Instruction in Academic Libraries. Aken, R., Olson, L., **3**: 94.

The Automated Maneuvering Board Training System: An Inprogress Implementation Evaluation. Van Matre, N., Robinson, C.R., **2**: 35.

Book Review. *The Computer and the Child: A Montessori Approach* by P.G. Gebhardt-Seele. Lovill, J., **3**: 99.

Book Review. *Computers in Education* by P.F. Merrill, M.N. Tolman, L. Christensen, K. Hammons, B.R. Vincent, P.L. Reynolds. Harris, K., **4**: 141.

Book Review. *Kyoiku Wa Konpyuta O Hitsuyo To Suruka* [Does Education Need the Computer?] by M. Amemiya. Nesbit, J., Okuda, K., **3**: 98.

Book Review. *LOGOWORLDS* by R.S. Heller, C.D. Martin, J.L. Wright. Cooney, J.B., **2**: 62.

Book Review. *Microcomputers and Music* by G.E. Wittlich, J.W. Schaffer, L.R. Babb. Lovelace, W., **3**: 98.

Book Review. *Microcomputers in Critical Care: A Practical Approach* by J.M. Dean, F.V. McLean. Sacks, E.J., **2**: 63.

Book Review. *Training Cost Analysis: A Practical Guide* by G.E. Head. Avner, A., **1**: 25.

Book Review. *Understanding Computer-Based Education* by M.A. Siegel, D.M. Davis. Lovill, J., **1**: 25.

A Comparison of Children's Reading Comprehension and Reading Rates at Three Text Presentation Speeds on a CRT. Blank, D., Murphy, P.A., Shneiderman, B., **3**: 84.

Computer-Assisted Instruction and Music Technology in Education. Bales, W.K., **1**: 2.

A Demonstration of an Expert System for Training Device Design. Singer, M.J., Perez, R.S., **2**: 58.

Deriving Ideal Student Models to Propel Intelligent Tutoring Systems. Gott, S.P., Bennett, W., Gillet, A., **2**: 43.

Developing the Technology for Intelligent Maintainance Advisors. Richardson, J.J., Jackson, T.E., **2**: 47.

The Effects of Orienting Objectives and Review on Learning from Interactive Video. Ho, C.P., Savenye, W., Haas, N., **4**: 126.

The Effects of Orienting, Processing, and Practicing Activities on Learning from Interactive Video. Hannafin, M.J., Phillips, T.L., Tripp, S.D., **4**: 134.

The Efficacy of Computer-Assisted Video Instruction on Rule Learning and Attitudes. Dalton, D.W., **4**: 122.

Efficacy of Higher Cognitive and Factual Questions in Computer Assisted Instruction Models. Schloss, P.J., Sindelar, P.T., Cartwright, G.P., Schloss, C.N., **3**: 75.

ERIC Research Abstracts. ERIC Clearinghouse on Information Resources, **1**: 27; **2**: 64; **3**: 100; **4**: 142.

An Expert System for Electronics Troubleshooting Based on Qualitative Causal Reasoning. Pipitone, F., **2**: 39.

Expert Systems for Department of Defense Training. Ahlers, R.H., Evans, R.A., O'Neil, H.F., Jr., **2**: 29.

Exploratory Programming Environments for Designing ICAI. Pliske, D.B., Psotka, J., **2**: 52.

An Interactive Videodisc Drama: The Case of Frank Hall. Harless, W.G., **4**: 113.

A Machine-independent Data Structure for the Representation of Musical Pitch Relationships: Computer-generated Musical Examples for CBI. Kolosick, J.T., **1**: 9.

Production and Evaluation of Interactive Videodisc Lessons in Laboratory Instruction. Smith, S.G., Jones, L.L., Waugh, M.L., **4**: 117.

Psychology Based Techniques for Improving Learning Within Computerized Tutorials. MacLachlan, J., **3**: 65.

Real Time Generation of Harmonic Progressions in the Context of Microcomputer-Based Ear Training. Prevel, M., Sallis, F., **1**: 6.

Research and Development in Instructional Video. Hannafin, M.J., **4**: 101.

Research and Evaluation Models for the Study of Interactive Video. Reeves, T.C., **4**: 102.

Software Review. *Student Word Perfect Word Processing Package* by Word Perfect Corp. McMorrow, S., Villachica, S., **4**: 140.

Some Comments on the Music Issue. Boody, C.G., **1**: 1.

Some Critical Factors that Limit the Effectiveness of Machine Intelligence Technology in Military Systems Applications. Harris, S.D. Owens, J.M., **2**: 30.

Systematic Evaluation Strategies for Computer-Based Music Instruction Systems. Wood, R.W., Clements, P.J., **1**: 17.

A Theoretical Framework for Interacting Linear Video. Allen, B.S., **4**: 107.

Using an Advance Organizer To Improve Knowledge Application by Medical Students in Computer-Based Clinical Simulations. Krahn, C.G., Blanchaer, M.C., **3**: 71.

Using a Touch Tablet as an Effective, Low-Cost Input Device in a Melodic Dictation CAI Game. Kirshbaum, T.M., **1**: 14.

Using Interactive Videotaped-Based Instruction to Teach On-the-Job Social Skills to Handicapped Adolescents. Malouf, D.B., MacArthur, C.A., Radin, S., **4**: 130.

SUBJECT INDEX

a

Accuracy of cognitive monitoring; **3**: 88.
Advance organizer (AO); **3**: 71.
Algorithmic generation of melodic patterns; **1**: 20.
Alternative research and evaluation approaches for interactive video; **4**: 103.
Ambiguity set; **2**: 41.
Analysis of covariance (ANCOVA); **3**: 86.
Appleworks Software Tutorial; **4**: 142.
Approximate string matching algorithm (ASMA); **3**: 80.
Art and animation; **3**: 69.
Articulation points; **4**: 110.
Artificial Intelligence (AI); **2**: 32.
  research; **2**: 31.
  technology; **2**: 29, 52.
Assimilation theory; **3**: 71.
Attention as a prerequisite to learning; **3**: 65.
Authoring system; **2**: 48.
Automated job performance aids; **3**: 100.
Automated Maneuvering Board Training System (AMBTS); **2**: 35.

b

BASIC; **3**: 98.
Behavioral tasks; **1**: 21.
"Best" test; **2**: 42.
Bibliographic instruction; **3**: 94.
Briefing interface; **2**: 50.
Browse interface; **2**: 50.

c

Cadential framework; **1**: 6.
CAI modules; **3**: 75.
"Case" simulations; **3**: 71.
Causal reasoning; **2**: 39.
Circle of 5th algorithm; **3**: 99.

Cognitive and factual questions; 3: 75.
Cognitive components of skill; 2: 44.
Cognitive monitoring; 3: 88.
Cognitive performance; 2: 33.
Cognitive Psychology Models; 4: 104.
Cognitive Science (CS); 2: 31.
Cognitive workload; 2: 33.
College-level bibliographic instruction; 3: 94.
Comparative Research Model; 4: 103.
Component Display Theory (CDT); 4: 110.
Components of technical competence; 2: 43.
Computer-aided musical composition; 1: 2.
Computer as
Tool, Tutee, or Tutor; 4: 141.
Computer Assisted Instruction (CAI); 1: 27.
in academic libraries; 3: 94.
modules; 3: 75.
Computer-assisted video instruction (CAVI); 4: 122.
Computer-based clinical simulations; 3: 71.
Computer-based education (CBE) in Japan; 3: 98.
Computer-Based Instruction (CBI)
in music; 1: 2.
modules; 4: 104.
Computer-Based Interactive Video (CBIV); 4: 126.
Computer-based music instruction systems; 1: 17.
Computer-based Natural Language Processing (NLP); 1: 27.
Computer equity; 3: 100.
training project; 2: 64.
Computer-generated intervals; 1: 12.
Computer-generated musical examples for CBI; 1: 9.
Computer in education in Japan; 3: 100.
Computer in the classroom; 3: 99.
Computer research confounding; 3: 100.
Computers in education; 4: 141.
Conceptual knowledge; 2: 43.
Control mechanism; 2: 31.
Cost analysis; 1: 25.
Courseware problem; 1: 25.
Creative Word Processing (CWP) in the classroom; 1: 26.
Criteria for selection and evaluation of hardware and software; 4: 141.
CRT display rates; 3: 84.
Curiosity and learning; 3: 65.

d

Danger associated with a technological approach to education; 1: 5.
DARMS; 3: 99.
Data abstraction and the problem of state; 2: 48.
Data structures; 1: 9.
Decision Support System (DSS); 2: 58.
Deficiencies in existing ICAI; 2: 53.
Design of the melodic dictation subprogram; 1: 20.
Designing ICAI; 2: 52.
Development of computer-assisted music instruction systems; 1: 17.
Development of intelligent machines; 2: 31.
Diagnostic hierarchy; 2: 48.
Digital Sound Laboratory's ear training program; 1: 17.
Diverging design approaches; 2: 31.

e

Ear training; 1: 6.
EDIST1 and EDIST2; 3: 81.
Edit distance algorithm; 3: 83.
Effect of screen size and resolution on the legibility of graphics; 3: 100.
Effect of various CRT display rates on reading speed and comprehension of text; 3: 84.
Effectiveness of computer-based education; 4: 143.
Effects of computer-based education on elementary school pupils; 1: 27.
Effects of orienting objectives and review on learning from interactive video; 4: 126.
Effects of orienting, processing, and practicing activities on learning from interactive video; 4: 126.
Effects of training on computerized aptitude test performance and anxiety; 4: 142.
Efficacy of computer-assisted video instruction on rule learning and attitudes; 4: 122.
Electronics troubleshooting; 2: 39.
Elements of technical expertise; 2: 43.
Evaluation of CAI; 2: 64.
EXERCETTE system; 1: 6.
Expected measurement values; 2: 49.
Experimental tools for ICAI design; 2: 54.
Expert-based microcomputer simulation program; 2: 35.
Expert system for electronics troubleshooting; 2: 39.
Expert system for training device design; 2: 58.
Expert systems for Department of Defense training; 2: 29.
Exploratory programming; 2: 54.
environments; 2: 52.

f

Factors affecting student performance; 4: 142.
Factual questions; 3: 75.
Fault hypotheses; 2: 41.
Fault Isolation System (FIS); 2: 39.
Feedback; 3: 92.
Formal testing of student competency; 1: 23.
Fully proceduralized job performance aid (FPJPA); 2: 49.

g

Generation of a phrase segment; 1: 7.
Generation of musical phrases; 1: 7.
Generative learning; 4: 108.
"Glass-box" editor; 2: 49.
GOMS model; 2: 43.
Graphic representation of computer-assisted music instruction system design; 1: 18.

h

Handicapped adolescents; 4: 130.
Hardware for computer-based music instruction systems; 1: 17.
Harmonic generation and succession; 1: 6.
Heuristics; 2: 32.
Highlight format; 3: 78.
Hiragana LOGO; 3: 98.
History of research in MI; 2: 30.
"How-to" interface; 2: 49.
Human factors engineering; 2: 32.

Human-machine dynamics; **2**: 33.
Hybrid knowledge acquisition strategy; **2**: 48.

i

IBM PC; **1**: 26.
IBM software; **4**: 140.
ICAI design problem; **2**: 52.
"Ideational scaffolding"; **3**: 71.
ILIAC Suite; **1**: 2.
Improving learning within computerized tutorials; **3**: 65.
Inadequacies of the Comparative Research Model; **4**: 103.
Incorporation of systemic evaluation operations into program design; **1**: 17.
INFO.ARRAY; **1**: 12.
Input device; **1**: 14.
Instruction content and format; **1**: 19.
Instructional design with NoteCard; **2**: 55.
Instructional Events Models; **4**: 104.
Instructional systems development model for interactive videodisc; **1**: 28.
Instructor input routines; **1**: 19.
Integrate CBI into a music program; **1**: 4.
Integrated cognitive schema; **3**: 92.
Intelligent computer-aided instruction (ICAI); **2**: 52.
"Intelligent" computerized tutor; **2**: 64.
Intelligent Design Environment and Authoring System (IDEAS); **2**: 56.
Intelligent maintenance advisors (IMA); **2**: 47.
Intelligent multimedia tutoring system; **2**: 64.
Intelligent tutoring systems; **2**: 43.
Interaction frames; **2**: 49.
Interactivating linear video; **4**: 107.
Interactivation; **4**: 107.
  as a process; **4**: 109.
Interactive computer-assisted videodisc laboratory simulations; **4**: 117.
Interactive drama; **4**: 113.
Interactive video; **4**: 102, 107, 113, 117, 122, 126, 130, 134.
  in art history; **4**: 134.
  in general chemistry; **4**: 117.
  in medical training; **4**: 113.
  to teach handicapped adolescents; **4**: 130.
Interactive videodisc
  design; **1**: 28.
  drama; **4**: 113.
  lessons; **4**: 117.
Interactive videotape; **4**: 130.
Intrinsic input device; **1**: 14.
Invitational education; **1**: 27.

j

Japanese CBE; **3**: 98.
Japanese education; **3**: 98, 100.
Jazz Dictator; **1**: 13.
John Henry Effect; **3**: 100.
Jump-ahead interface; **2**: 50.

k

Knowledge base; **2**: 31.
Knowledge compilation; **2**: 40.
Knowledge Engineering (KE); **2**: 32, 48.
  System (KES); **2**: 58.
Knowledge gaps that impede progress in developing MI for military systems applications; **2**: 30.
Knowledge representation; **2**: 33.

l

Laboratory simulations; **4**: 117.
Leading; **3**: 84.
Lesson access times; **4**: 134.
Library skills; **3**: 94.
LISP; **2**: 30.
Lisp Object and data Oriented Programming System (Loops); **2**: 54.
Loci; **3**: 68.
LOGO; **2**: 62; **3**: 98.
LOGOWORLDS; **2**: 62.
Loops; **2**: 54.

m

Machine-independent data structure; **1**: 9.
Machine intelligence technology; **2**: 30.
MACSYMA; **2**: 33.
Mathemagenic activity; **4**: 108.
Mathematical symbolic manipulation; **2**: 33.
Mathland metaphor; **1**: 14.
Mayer's assimilation theory; **3**: 71.
Medical applications for microcomputers; **2**: 63.
Melodic dictation; **1**: 20.
  CAI game; **1**: 14.
Melodic figuration; **1**: 21.
Mental models; **2**: 44.
Merging Paradigms; **2**: 56.
Method of controlled correlation; **4**: 103.
Methods of harmonic generation; **1**: 6.
Microcomputer-based ear training; **1**: 6.
Microcomputer courseware; **1**: 27.
Microcomputers and music; **3**: 98.
Microcomputers in critical care; **2**: 63.
Mnemonic devices; **3**: 68.
Models of technical competence; **2**: 43.
MOD(ulation) algorithm; **1**: 8.
  using the ASCII code; **3**: 99.
Module formats; **3**: 75.
Montessori approach to the computer and the child; **3**: 99.
Multimedia knowledge representation; **2**: 64.
Multi-paradigmatic approach to evaluation of CAI; **2**: 64.
Music and computing; **1**: 1.
Music CBI; **1**: 1.
Music drill-and-practice environment; **1**: 14.
Music Instrument Digital Interface (MIDI); **1**: 18.
Music Sound and Graphics Package (MSGP); **1**: 13.
Music technologist; **1**: 2.
Music technology
  and computer-based instruction; **1**: 3.
  in education; **1**: 2.
Musical acoustics; **1**: 3.
Musical pitch organization; **1**: 13.
Musical pitch relationships; **1**: 9.
Musical structure generation; **1**: 9.
The Musician's Toolbox; **1**: 12.

n

Natural Language Processing (NLP); 1: 27.
NoteCards; 2: 55.

o

Objectives of applied MI technology; 2: 32.
Offsets and interval relationships; 1: 11.
On-line evaluation; 1: 22.
Ordering of pitch records; 1: 10.
Orienting activities; 4: 134.

p

Paging; 3: 85.
Parameters for the generation of musical phrases; 1: 7.
Parsing instructional strategies; 4: 110.
Partial presentation of information; 3: 66.
Pascal; 1: 26.
Perfect Fifths Array (P5ARRAY); 1: 11.
PILOT; 3: 94.
Pitch classes; 1: 10.
Pitch representation; 1: 9.
PLANIT; 3: 81.
PLATO; 3: 81.
PLOT (Programmed Learning Organizational Tool); 2: 56.
Portable intelligence maintenance advisor hardware unit; 2: 48.
Post's production system model; 2: 30.
Potentials of word processing; 1: 26.
Power Pad; 1: 14.
Prescribed proficiency value; 1: 22.
Probability-Based Decision Making; 4: 115.
Probability of a fault hypothesis; 2: 41.
Problem solving performance; 2: 43.
Procedural content; 2: 43.
Processing of a measurement result; 2: 40.
Processing opportunity; 4: 134.
Production rules and systems; 2: 31.
PROLOG; 2: 30.
Psychoacoustics; 1: 3.

q

Qualitative causal reasoning; 2: 39.
Question format; 3: 78.

r

Rate of text presentation; 3: 84.
Reading speed and comprehension; 3: 87.
References interface; 2: 50.
Representation of musical pitch relationships; 1: 9.
Representation problem; 2: 52.
Repurposing; 4: 107.
Research and development in instructional interactive video; 4: 101.
Research and evaluation models; 4: 102.
Role of music technologist in the future; 1: 5.

s

Scales; 1: 10.
Scheffe' tests; 3: 86.
Scrolling; 3: 84.
Simple contrapuntal (note-against-note) generation; 1: 21.
Skill integrator; 2: 48.
  interfaces; 2: 50.
Skill multiplier; 2: 47.
  interface; 2: 49.
Software-based digital synthesis; 1: 3.
Software components; 1: 18.
SOUNDEX; 3: 81.
Steps for building instructional programs; 1: 4.
Stress; 2: 33.
Student comprehension monitoring; 3: 88.
Student Word Perfect Word Processing Package; 4: 140.
Students perceptions of interest in using computers; 4: 143.
Systematic evaluation; 1: 17.
  strategies; 1: 19.
Systems modeling; 4: 105.

t

Task analysis; 2: 33.
Teach on-the-job social skills to handicapped adolescents; 4: 130.
Technology of the computer; 4: 141.
Text presentation speeds on a CRT; 3: 84.
Thematic organization; 3: 67.
Tonic representation; 1: 11.
Touch tablet; 1: 14.
Tracking momentum; 3: 87.
Training cost analysis; 1: 25.
Training device design; 2: 58.
Training Device Requirements (TDR); 2: 58.
Training system design; 2: 58.
TUNEMASTER; 1: 14.
Tutor interface; 2: 50.

u

UCSD Pascal; 1: 26.
Unconventional harmonic movements; 1: 8.
Understanding; 3: 91.
Understanding computer-based education; 1: 25.
Use of computers in education by nonspecialists; 1: 25.
User interfaces; 2: 49.
User proficiency; 1: 22.
User-system interaction; 1: 22.
UUT-specific knowledge; 2: 40.

v

Videodisc authoring and production process; 1: 28.
Voice leading; 1: 6.

w

Where-from and where-to interfaces; 2: 49.
Why questions are effective; 2: 64.
Windowing techniques; 2: 64.
Word processing; 1: 26; 4: 140.
Workload assessment techniques; 2: 33.

z

Zeigarnik effect; 3: 69.
